DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Heidelberg (DE 1044579) in view of Mano.

It appears that Heidelberg discloses the invention substantially as claimed except for telescoping pressing devices. However, Mano teaches telescoping devices (6, 7) for the purpose of providing careful separation pressure between the upper and lower tools. See e.g. Figs. 9-11. Thus it would have been obvious to the ordinary artisan at the time of the instant invention to provide the device of Heidelberg with the telescoping pressing devices as taught by Mano in order to facilitate careful separation of the blanks.
